

**Do you generate revenue
by providing reports and
other information?**

Research data, business plans, forward-looking financials & MIS reports are just some examples of information which is best used within the walls of the enterprise. Malicious intent, errors, omissions & lack of awareness could make this information publicly available leading to monetary and reputation losses.

SECLORE FILESECURE

Share with Confidence !

Seclore FileSecure protects information from leakage due to malicious intent, errors and omissions as well as lack of awareness by providing a secure method of protection. This means that confidential information remains confidential.

Seclore FileSecure allows enterprises to define and implement information usage policies. A policy is an "answer" to four Questions i.e.

🔒 **WHO** can use the information

People & groups within and outside of the organization can be defined as rightful users of the information

🔒 **WHAT** can each person do

Individual actions like reading, editing, printing, distributing, copy-pasting, screen grabbing etc. can be controlled

🔒 **WHEN** can he use it

Information usage can be time based e.g. can only be used by Mr. A till 25th Sept or only for the 2 days

🔒 **WHERE** can he use it from

Information can be linked to locations e.g. only 3rd floor office by private/public IP addresses

Seclore Technology (incubated and promoted by IIT, Bombay) is a leading provider of information security solutions in the areas of information usage control, information rights management (IRM) and secure outsourcing. Its expertise lies in protection of data post distribution irrespective of its location or mode of transfer.
